Mrs. Gertrude S. McMurray
Solid Propellant Information Agency
Applied Physics Laboratory
The Johns Hopkins University
Silver Spring, Maryland

Dear Mrs. McMurray:

Thank you for your letter of 14 September enclosing replies to the questions submitted by Mr. Magnusson at the 14 June Propellants Seminar. They have been forwarded to him.

The additional twenty copies of the Solid Propellant Survey were received in good time and are being distributed appropriately. A number of people have already used these reports to good advantage and I am sure that, as time goes on, they will prove useful to many others.

As you may have heard from [redacted] we agreed in a telephone conversation yesterday that you and your associates will supply us with corrected transcript for only the parts which add significant details to what is included in the Solid Propellant Survey. These parts are presumed to include all of the discussion period.

25X1A9a

The cooperation of all of you in helping us to finalize our report on the June Seminar is greatly appreciated.

Sincerely,

25X1A9a
